Equivalent forces in both directions - Capacity 10, 25 and 50 tonnes

Description

These cylinders with separate pump suitable for use in all push and pull positions are controlled remotely.

As for cylinders with built-in pumps (EKPI), they are used for welding, assembly or straightening work.

Specifications

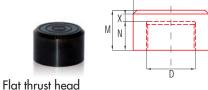

- Force 10 to 50 tonnes
- Stroke 120 mm to 150 mm
- Differential remote power supply via BHC hand pump or with motor
- Smooth piston with anti-seizing, corrosion-proof treatment with wiper seal
- Flat thrust head, pull ring or female clevis, detachable
- Female 3/8 NPT oil intakes

On request

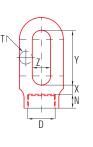

- Different strokes
- Specific tackle
- Shafts for female clevises
